PRESIDENT'S MESSAGE

Honourable Faculty Members and Delegates

Assalam-o-alaikum,

On behalf of the Nuclear Medicine & Allied Community and the Executive Council of the Pakistan Society of Nuclear Medicine (PSNM), it is my privilege to warmly welcome you to the 11th Annual Conference of PSNM, being held at the Pearl Continental Hotel, Rawalpindi.

The theme of this year's conference, "Nuclear Medicine Today – Redefining Clinical Practice," reflects the remarkable evolution of our specialty and the expanding role of Nuclear Medicine in modern healthcare. From advanced molecular imaging and theranostics to Nuclear Cardiology, radiopharmacy and targeted radionuclide therapies, our field continues to transform clinical practice.

The Scientific and Organising Committees have worked with great dedication to bring together a diverse scientific programme, featuring renowned national and international faculty, experts from more than a dozen countries, interactive scientific sessions, interesting case discussions, oral and poster presentations, and opportunities for meaningful professional exchange.

This year, we have further expanded the conference through four pre-conference workshops covering Theranostics, Nuclear Cardiology, Radiopharmacy, and Nuclear Emergency Preparedness & Safety, providing focused opportunities for practical learning and professional development. Dedicated sessions for Nuclear Medicine technologists, along with scientific awards and recognition of novel research, further strengthen our commitment to nurturing the next generation of Nuclear Medicine professionals.

The conference also provides an important platform for interaction with our industry partners, who continue to contribute to technological advancement and innovation in our specialty. We sincerely appreciate their support and participation in making this scientific gathering possible.

I encourage all participants to take full advantage of the conference—not only to learn from the distinguished faculty, but also to share experiences, build collaborations, present their work, and strengthen the bonds within our Nuclear Medicine community.

I extend my heartfelt gratitude to all the office bearers of PSNM, our faculty, delegates, sponsors, industry partners, Scientific Committee and Organising Committee for their invaluable contributions.

May this conference be a rewarding experience for all of us and contribute meaningfully to the advancement of Nuclear Medicine in Pakistan.
